ROTW = Rest of the world ;-)

Team scoring Criteria

- (1) Biased towards team with highest number of participants
- (2) The team with smallest number of participants 'awarded' last place plus one and so on until their number of team scores matches up with the team with the next smallest number of participants.
- (3) Once team scores are balanced then the remainder of the team scores are populated based on the order that the actual runners from each team finished
- (4) If a team doesn't have enough finishers to satisfy (3) then continue adding positions until the team numbers are equalised

Advantages

- (1) Promotes mass participation
- (2) Everybodies position counts....sometimes twice!
- (3) It's a bit of a change!
- (4) A great opportunity to use excel!
